Ojasvi Doye

SUMMARY

I'm a 2nd-year engineering student passionate about machine learning and data analysis. I love uncovering insights from data and exploring the potential of artificial intelligence. I have a solid foundation in programming and statistical analysis, and I'm constantly seeking opportunities to deepen my knowledge in this field.

PROJECTS

CareerVoyant: Mapping Your Path to Professional Excellence

Machine Learning, Data Analysis

The Career Navigator is a data-driven project designed to assist engineering students in making informed decisions regarding their career placements after completing their final year. The project utilizes machine learning techniques and historical placement data to predict the potential job prospects and industry preferences based on individual student profiles.

CarSage: The Intelligent Car Price Oracle

Machine Learning, Data Analysis

The Car Price Predictor project is a machine learning-based system designed to accurately estimate the price of used cars. By analyzing various factors such as make, model, mileage, year of production, and other relevant features, the model predicts the approximate selling price of a car.

EDUCATION

B.Tech in Electronics and Computer Science

Jun '22 - Present

Vidyalankar Institute Of Technology, Mumbai

Mumbai

CGPA - 9.2

TECHNICAL SKILLS

Languages: Python, JavaScript, Java

Machine Learning, Artificial Intelligence, Data Analysis, Front-End Web Development, Object Oriented Programming, Robotic Process Automation (UiPath)

KEY SKILLS

Communication Skills

Problem-Solving and Critical Thinking

Leadership and Teamwork

Adaptability and Flexibility

Time Management and Organization
